

Task Assessment Video Aids to Promote Appropriate Early Return to Work in Specific Construction Trades

Through a SHIP Grant, University of Washington has collaborated with Washington State Building and Trades Council (WSBTC) to create five 5-minute videos for Washington treatment providers about specific task demands for the following occupations:

- Plumbers
- Electricians
- Sheet Metal Workers
- Iron Workers
- General Laborers

These videos detail solutions that clinicians may wish to adopt in order to overcome barriers to enrollment in graduated return to work programs following injury. The videos are supported with textual information and references. Each video is devoted to the work demands and alternative work options for each of the five construction trades.
